

R E M A R K S

Claims 1-89 were filed in the parent case (PCT US98/03194, filed May 5, 1998, published November 12, 1998. Now Applicants file a continuation application from U.S. Patent Application No.: 09/402,618, cancel Claims 1-89, and add new Claims 90-121.

A computer readable sequence listing form used in the present application is identical to the computer readable sequence listing form used in the parent application, Serial Number 09/402, 618, filed July 18, 2000. Furthermore, the compact disc copy of the sequence listing provided in the parent application is identical to the computer readable copy of the present application. Applicants hereby request per 37 C.F.R. § 1.821(e) the use of the compliant computer readable sequence listing already on file for the parent application. A separate 37 C.F.R. § 1.821(e) letter is simultaneously submitted.

In addition, the Specification is now amended to correct typographical errors and to provide the nucleic acid sequences recited in Figures 2, 11A, 11B, 15, 16A, 16B, 17B, 17C, 18A, 18B, 18C, 18D, 20A, 20B, 22, 24, 26, 29A, 29B, 31, 37A-C, 38A-C, 39, 40-42, 43A, and 43B be identified in the Sequence Listing. These amendments were previously accepted into the parent application. Applicants respectfully submit that many of the allegedly non-identified nucleic acid sequences merely provide portions of larger previously identified sequences. These amendments do not add new matter.
